PERHAPS THE GREATEST HYPOCRITE OF THE INSECT KINGDOM IS THE PRAYING-MANTIS. HIS PIOUS ATTITUDE IS USED TO LURE OTHER INSECTS NEAR, THEN HE GRASPS THEM WITH HIS FOLDED HANDS!

THE WORLD'S LARGEST ISLAND HAS AN AVERAGE OF ONE INHABITANT FOR EACH 50 SQUARE MILES!

Greenland

NATURAL GAS, AS SERVED IN CALIFORNIA, HAS TWICE THE HEAT-VALUE OF MANUFACTURED GAS--

There are many superstitions about the Praying Mantid. The Japanese, when sleeping, tie them near to eat the troublesome mosquitos. The female is very brave and often eats her much smaller mate.

While much of Greenland is uninhabitable, population figures are startling when compared to such a heavily populated country as Japan, where there are more than eighteen thousand persons to each fifty square miles.

Natural gas is rated at approximately 1100 B.t.u.'s and manufactured coal and water gas as served in many sections of the East is rated at about 550 B.t.u.'s. There are 33 producing major natural gas and oil fields in California, and gas appliances serving a population of 6,000,000 in California are connected by a network of transmission and distribution lines with all of them.
